Valiant™

PRE-MILKING PRODUCTS

The VALIANT Foam-Ultra range

The ultimate teat disinfection and cleaning!

- Valiant Foam-Ultra delivers longer, 21 day stability following activation with the special Catalyst. This means that if you have just 120 cows milked twice each day, you can mix all 20 litres at once
- Specially developed Chlorine Dioxide disinfects from the moment it's applied to the teats even in the presence of >20% organic matter. Operating at >5 logs, Valiant Foam-Ultra reduces the number of viable bacteria on the teat by more than 99.999%
- Surfactants cut through muck so that drying /cleaning is done quickly
- Incredible, super-fast skin conditioning
- Available in 20 and 200 litre packs
- Valiant Foam-Ultra is available to be dipped and dried or in a single use wipe form!

VALIANT Foam-Ultra

- Applied via a foaming dip cup
- Drying / cleaning is done quickly and easily with a single-use paper or cloth towel
- Available in 20 and 200 litre packs

Simply the best thing you can use to clean and disinfect your cows' teats before milking.

VALIANT Foam-Ultra Wipes

- All the benefits of Foam-Ultra in one-wipe!
- Cleaning is done quickly with the single wipe
- Specially tested wipes combine with Valiant Foam-Ultra providing a one pass option
- Ideal for use in rotary parlours or in parlours where time is at a premium
- Delivered as a kit that is then made up easily by the farmer on farm
- Each 20 litre kit makes up 4800 wipes to be used at a rate of one wipe per cow per milking
- Each handful of wipes will foam beautifully once squeezed

Fast from start to finish... ultra-fast disinfection, super-quick cleaning and speedy cow-flow.

SANISAFE3 Wipes

Not Valiant, but SANISAFE3 Wipes are premium ready-to-use wipes!

- Impregnated with tried, tested and proven anti-bacterials registered with the EU as PT3
- Alcohol, QAC and Biguanide free
- Delivered in buckets (x 700 wipes) or refills (3 x 700 wipes)
- Use one per cow per milking

Sanisafe3 wipes are an effective, convenient, economical option where maintenance of good udder health is the aim.

POST-MILKING PRODUCTS

VALIANT Barrier & VALIANT Versatile

Features common to both products...

- Dual antibacterial agents provide instant disinfection and continue reducing bacterial numbers for the next 8 hours
- Generated by the addition of catalyst and then active for 14 days, chlorine dioxide and lactic acid work in tandem to reduce bacteria by over 5 logs
- Continues working well even in the presence of at least 20% organic matter

VALIANT Barrier

Simply the best post milking dip!

- Valiant Barrier protects with a robust, flexible, vibrant green barrier on the teats. This also means any cows still to be dipped are easily identified
- Available in 20 and 200 litre packs

Provides the ultimate protection available for modern, productive dairy cows' udder health.

VALIANT Versatile

All the quality of Barrier, just no barrier.

- Mainly used as a post milking spray – but can also be dipped, and can be used as a pre milking disinfectant too.
- Vibrant green colour makes it easy to spot the cows that still need dipping / spraying
- Available in 20, 200 and 1000 litre packs

Valiant Versatile is exactly what its name suggests... It's versatile!

Get great performance with Valiant™ EVERYDAY

Ready-to-use, lactic acid based post milking teat spray or dip for the maintenance of great udder health.

Appropriate for use in organic farms

Available in 200 and 1000 litre units

Don't just take our word for it, find out what our customers have to say...

Paul Perrin who milks cows through a Lely robot in the Aube region of France comments:

“Our motivation to use Valiant Everyday: complete and effective protection at an affordable price. The use of the new formulation has coincided with improvements in the health status of the herd and milk quality. Used through our robot, the spray is consistent and effective. We recommend this product!”

Benjamin Petit who milks 125 cows through two Lely robots in Loiret, France comments:

“We've been using Valiant Everyday for five months with results that have always been in line with our objectives. We are satisfied with both its usage rates and its spray quality.”
