NON-DISPOSABLE B6-3280 O-RINGS | ITM00656

For use with cattle Insemination Guns.

Multiple colors available for easy identification.

Non-Disposable O-rings | ITM00656

Item Number All colours available

ITM00656

CITO CUTTER | ITM00659

The Cito Cutter is designed to quickly cut off the crimped end of the semen straw.

A push of the button cuts the straw off at the proper length.

Cito Cutter | ITM00659

Item Number

ITM00659

LN2 MEASURING STICK | ITM0419

Liquid Nitrogen Measuring Stick/Ruler (reads 1 - 50cm).

- Durable.
- Easy to use liquid nitrogen ruler.

LN2 Measuring Stick | ITM0419

Item Number

ITM0419

TWEEZERS PLASTIC | ITM00661

Tweezers designed with a specifically grooved tip that grips and surrounds the straw, yet does not crush it during removal of the straw from the liquid nitrogen storage.

Protects your hands during semen handling as plastic transmits very little heat or cold.

Tweezers plastic | ITM00661

DISPOSABLE SHEATH PROTECT (80/roll) | ITM00735

The sanitary sleeve is a fine plastic sleeve that fits over the gun when it is ready for ET. The gun is inserted with the sanitary sleeve in place covering the gun. It prevents any contamination from the outside of the animal being picked up by the gun and getting carried into the uterus, which may reduce conception.

VALIANT NON RETURN TEAT CUP (GREEN) | ITM02630

Non Return Dip Cup (Green) a non-return valve inside the cup prevents the already used teat dip from siphoning back down into the reservoir, making it hygienic, practical and safe for use.
It features an angled cup with handle on the top connected to a plastic bottle at the bottom. The splash proof bottle holds approximately 300ml of solution.
The Dip Cup is chemical resistant and durable.

**Non Return Teat Cup
ITM02630**

Item Number

ITM02630

VALIANT MANUAL FOAMING CUP (BLUE) | ITM02537

This manual foaming teat dip cup uses a special foaming insert which sits in the dip cup reservoir. It generates foam as the dip cup is squeezed and raises to fill the dip cup chamber with foam.
Easy squeeze action for rapid and consistent foam generation.
Can be dismantled for cleaning.
Foaming technique is used to save liquid usage, but ensure optimal coverage of each teat.
It features an angled cup with handle on the top connected to a plastic bottle at the bottom.
